

Full Stack Developer Assignment (3+ Years)

Please complete the following assignment within **1 day**. The objective is to evaluate your frontend development skills, API integration, code quality, and problem-solving ability.

Assignment Task

Build a responsive **Task Management Web Application** using the MERN Stack. The application should allow users to:

- Add a new task
- Edit and delete tasks
- Mark tasks as completed
- Display all tasks in a clean responsive UI
- Fetch and store data using APIs

Technical Requirements

- Frontend should be developed using React.js
- Backend should be created using Node.js and Express.js
- Use MongoDB for database storage
- Implement proper API integration
- Application should be responsive and optimized for performance
- Use clean and structured code with proper folder organization

Submission Guidelines

- Share the GitHub repository link
- Include setup instructions in README.md
- Mention any assumptions or additional features implemented
- Submit the assignment within 1 day from receiving it

Good luck! We look forward to reviewing your submission.
